

Note on the increase in the radiation levels in Kiev

May 2, 1986

Secret

According to the Kiev State Sanitary and Epidemiological Station, the situation in Kiev is characterised by the following data:

- Gamma radioactivity began to increase at 7:30 PM, reaching 20–22 $\mu\text{Sv/hr}$ by 8:00 PM; the increase, although slight, continues.
- Water activity is 37 Bq/L per litre.

Gamma radioactivity results obtained at 9:00 PM.

Head of the 4th Department of the 6th Department of the UKGB of the Ukrainian SSR for Kiev and Kiev Oblast, Lieutenant Colonel Lamonov
