

Note on the response of Kiev residents to the radioecological situation in the capital

May 8, 1986

Secret

According to the Kiev State Sanitary and Epidemiological Station, as of 8:00 a.m. on May 8, the situation in Kiev is characterised by the following data:

- air radioactivity 11–12 $\mu\text{Sv/hr}$, indoors 1.2 $\mu\text{Sv/hr}$.
- water activity is 3.7 Bq/L. The situation at the enterprises serviced by the department is generally normal.

The management of Kyivenergo, Glavkyivgorstroy, PUVKH, and Oblagroprom were summoned to the relevant district party committees, where they were ordered to cancel all types of vacations.

Party members who take their children away from Kiev will be held strictly accountable by the Party.

No information on widespread negative manifestations has been received.

Head of the 4th Department of the 6th Department of the UKGB of the Ukrainian SSR for the city of Kiev and Kiev region
Lieutenant Colonel Lamonov
